

CEO's Corner

Ajay Prasad

How Can Everyone Help First Bit Succeed?

After analyzing my experience working with large established & successful companies, a startup that went public at \$7B valuations, a successful launch of a consumer electronic product, failed \$20M funded startup, and the successes/struggles of my entrepreneurial journey, the following three factors are consistent with all successful & failed businesses I have been associated with through my business life:

- » Product
- » People
- » Process

You can find the same three success factors in many business books. Still, I want to give you my perspective on each in hopes that all of you would know how you can apply the information to help with the success of First Bit; and, by extension, GMRW, RepuGen, and TCI.

Know Your Colleagues

Achlanand Jha

I was born and brought up in Saharsa, Bihar. I did my schooling from Saharsa and then completed B.tech(CSE) from T M U, Moradabad, in 2020. I got the opportunity to serve FirstBit Digital Technologies as a Software Engineer in February 2021. Since then, I have learned a lot of new stuff, thanks to my teammates and seniors. I have been very fortunate for my colleagues' constant support and guidance. Apart from this, I love reading novels, playing cricket, and exploring new things.

Simran Kaur

I was born and raised in Patna, Bihar. I did my graduation from Calcutta University and then went on to do my Master's in Advertising and public relations from (MCU), Bhopal. I joined FirstBit Digital Technologies in August 2020 as a fresher and got the opportunity to work under Avinash sir. His guidance and support helped me greatly in different aspects of digital marketing. I am also very thankful to my seniors, Mahesh Kumar, Amit Ranjan, and Kirti Bala, for their constant support and encouragement. Besides the regular work, I love listening to music, cooking, and exploring makeup tricks.

THE HR SPEAKS
